

Lucerne, Switzerland, September 30 2015

## RMI Analytics AG publishes the latest edition of its Brewing Raw Material Journal.

On September 30 RMI Analytics AG published the latest bi-weekly edition of the industry acclaimed Brewing Raw Material Journal (BRMJ).

In the BRMJ RMI Analytics reported:

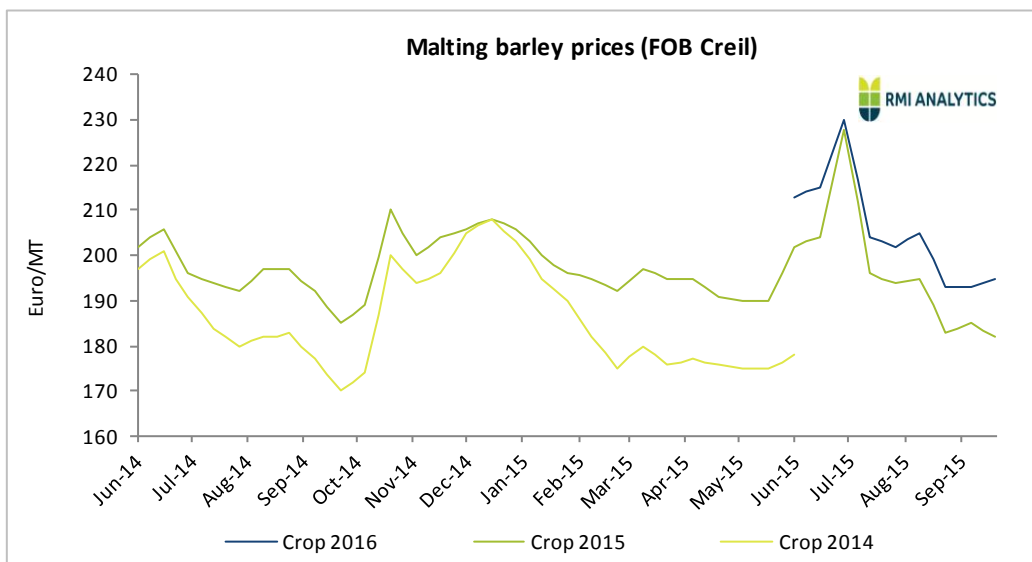

EU barley prices only move slightly in the last two weeks with interest seen still in crop 2016 over current crop.

Dryness comes to Australia spooking markets and farmers at this late stage.

Good USA production over contracted amounts could depress prices in the North American market.

Argentina is looking good with concerns over low protein and El Nino the only major worries.

### Notes to editors

RMI Analytics AG is a Swiss limited liability company which provides market insights, creates networking platforms and offers advisory services for the barley, malt and beer industry. RMI Analytics aims to help its customers making better decision and to be recognized as the adviser of choice for brewing raw materials.
